Available ***Rund um den Watzmann*** releases:

LP Object/Box-Set Felix Knoth – Die Pein vom Haupt entfernen

This box-set combines a mini-LP with 8 musical tracks with a primitive film projector called 'zootrope' containing 8 short films. The 8 musical pieces are connected to the 8 short films, which can be both listened to and seen on your record player. No complicated assembly kit, no risk for your record player, everything is quickly installed and again adds, as usual with these Rund um den Watzmann releases, a new dimension to the medium 'long player'.
Felix Knoth, also known as Felix Kubin, ½ Klangkrieg or ¼ Liedertafel Margot Honnecker, realized a short film with the same title back in 1994. Both film and music are a restless self-reflection. This object is an archetype in the tradition of the Tödliche Doris Box or the Vegetarian Bavarian in Exile Box. Apparently it has to be in a box.

(wholesale: 5 & more copies ex. VAT: 23,- each)

CD Erwin Stache - Harmonie der nicht ganz reellen Töne

This is the first full-length **CD by Erwin Stache**, a unique sound-creator and builder of the most extravagant sound-objects. Stache found a unique way of combining the old DDR-look and sound with new technology and creates his own absurd sound-happenings. This CD is an object by itself, because the packaging is a mysterious musical instrument you have to discover. The CD combines his electro-acoustic music with his extraordinary sound-objects. Each object is handmade and forces you to an interaction with the CD. It gives you a good overview of his work since each track is quite different and caused by a different starting-point. Don't miss this one; it's a milestone for CD's in general. It includes a 20 page booklet full of information.

WATZMANN 008 NL98 NEW 19,-

EP Af Ursin (= Timo van Luyk / Noise Maker's Fifes) - Korale

<222/numbered> INSERT in luxury varnish-effect aluminum cover, abstract with a 3-dimensional depth; each cover is different & I'm sure, you have never seen something like this; as it was very expensive to make (each cover costs about EURO 10,- to make), the price is relatively high, but when you see it, you'll understand.
The music is comparable to Organum or the instrumentation of Keiji Haino with a beautiful Belgian melancholy in it.

WATZMANN 007 NL97 NEW 19,-
(wholesale: 5 & more copies ex VAT: 15,- each)

Rund um den Watzmann Records focuses on extraordinary vinyl releases and to a lesser extent on CD-releases. The aim of these releases is to fully explore the wide range of possibilities of especially the LP format and the product-packaging. Each item concentrates on a special theme and is as much a musical expression as it is an artistic object.

If you have any suggestions about the catalogue, releases, service etc., please let me know.
If you know people who like to get my catalogue just give me their address and I will send them a copy.
